

Model Card: Case Recording Drafting Engine

Document Reference: DOC-07

System: Case Ace v2.0 Client Consultation Recording & Note Drafting System

Organisation: Citizens Advice Wandsworth (CAW)

Standard: ISO/IEC 42001:2023 & Advice Quality Standard (AQS Level 3)

Model Architecture: Frozen Large Language Model (Generative Pre-trained Transformer)

Status: Production Baseline

Classification: Official-Sensitive / Governance Pack

1. Model Details & Configuration

2. Intended Use & Application Scope

Permitted Uses

Structured Case Note Drafting: Transforming surrogate-tokenised advice consultation transcripts into formal, comprehensive case notes aligned with the Advice Quality Standard (AQS Level 3 - Advice and Casework).

Standard Case Note Sections:

Confirmation of Enquiry: Concise statement of what the client presented seeking assistance with.

Background & Chronology: Verifiable substantive facts, income/expenditure, household composition, health conditions, and creditor status.

Advice Given & Options Explored: Clear explanation of statutory rights, benefit entitlements, debt options (DRO/bankruptcy/repayment), housing rights, or employment law principles explained by the adviser.

Statutory Deadlines & Time Limits: Explicit identification of mandatory reconsideration deadlines (1 calendar month), tribunal appeal windows, court hearing dates, or limitation periods.

Action Plan & Agreed Next Steps: Explicit division of tasks between Client actions (e.g. gather bank statements) and Adviser/Bureau actions (e.g. contact creditor/landlord).

Gaps & Evidentiary Limitations: Explicit flagging of missing documents, unverified figures, or areas requiring further investigation.

Safeguarding & Risk Flags: Highlighted safety notices for domestic abuse, eviction risk within 7 days, mental health crises, or disconnection threats.

3. Explicitly Out-of-Scope & Forbidden Uses

[!CAUTION]

Prohibited Operational Boundaries:

Zero Autonomous Advice: The model MUST NEVER generate advice directly for a client without qualified adviser mediation.

Zero Automated Entitlement Determination: The model does not make statutory decisions, benefit awards, or debt relief eligibility determinations.

Zero Autonomous Third-Party Communication: The model cannot send emails, letters, or notifications to the DWP, local authorities, landlords, or courts.

Zero Legal Representation: The system is designed strictly for Citizens Advice casework records and does not provide formal legal opinion or litigation drafting.

4. Input & Output Data Formats

Input Payload (Transmitted to Vertex AI)

Surrogate Tokenised Transcript: Text where all direct personal identifiers (Names, NINOs, Postcodes, Addresses, Phones, Emails, Employers) have been replaced with systematic tokens:

[ADVISER]: Good morning [CLIENT_NAME_1]. How can we help today?

[CLIENT_NAME_1]: I've received a Universal Credit sanction notice. My NINO is [NINO_1] and I live at [ADDRESS_1], [POSTCODE_1].

Topic Classification: Category identifier (e.g. welfare_benefits, debt, housing, employment, energy).

Output Payload (Returned to Client Browser)

Structured JSON Schema:

```
{
  "confirmationOfEnquiry": "...",
  "backgroundFacts": "...",
  "adviceGiven": "...",
  "statutoryDeadlines": ["..."],
  "actionPlan": {
    "clientActions": ["..."],
    "adviserActions": ["..."]
  },
  "gapsAndLimitations": ["..."],
  "safeguardingNotes": "...",
  "confidenceScores": { "overall": 0.98 }
}
```

5. Measured Benchmark Performance (Synthetic Corpus)

Evaluated across the 33-scenario Synthetic Advice Corpus representing welfare benefits, Universal Credit, disability benefits, debt, housing, employment, energy, safeguarding disclosures, and prompt injection:

6. Known Limitations & Human Compensating Controls
