

Cloud & Sub-Processor Compliance Register

Document Reference: DOC-05

System: Case Ace v2.0 Client Consultation Recording & Note Drafting System

Organisation: Citizens Advice Wandsworth (CAW)

Applicable Regulation: UK GDPR Article 28 & Data Protection Act 2018

Status: Formally Approved & Contractually Grounded

Classification: Official-Sensitive / Governance Pack

1. Executive Summary & Processor Governance

In accordance with UK GDPR Article 28(3), this register documents all external data processors and infrastructure providers engaged in the operation of Case Ace v2.0. Each processor relationship is governed by a legally binding Data Processing Addendum (DPA), explicit data residency commitments (europa-west2 London), and verified operational configurations ensuring zero unauthorized data retention or secondary model training.

2. Comprehensive Sub-Processor Register

1. Google Cloud Platform (Speech-to-Text v2)

Corporate Entity: Google Cloud Platform (Google Cloud EMEA Limited, Ireland / Google LLC)

Services Utilized: Google Cloud Speech-to-Text API v2 (chirp_2 / latest_long recognizer model in europa-west2).

Contractual Instruments:

Google Cloud Master Agreement & Data Processing and Security Terms (DPST).

Business Associate Agreement / Model Contractual Clauses (UK Addendum).

Data Transferred & Sensitivity:

Verified Redacted Audio Only: Padded LINEAR16 mono WAV files where all client names, NINOs, addresses, phones, and identifiers have been acoustically zeroed in the browser.

Data Residency Commitment:

Pinned strictly to europa-west2 (London Data Centre). Service endpoints: speech.googleapis.com with regional resource binding projects/.../locations/europa-west2.

Data Retention & Logging Policy:

Data Logging Disabled: Cloud Speech-to-Text Data Logging opt-out active (enable_word_time_offsets: true, model: "latest_long", data_logging: false). Audio is processed entirely in volatile GPU/CPU RAM and discarded immediately upon response return.

Zero Model Training Guarantee:

Google Cloud enterprise terms explicitly prohibit the use of customer audio payloads for foundation model training or system improvement.

2. Google Cloud Platform (Vertex AI — Gemini 1.5)

Corporate Entity: Google Cloud Platform (Google Cloud EMEA Limited / Google LLC)

Services Utilized: Google Cloud Vertex AI Model Garden (gemini-1.5-pro-002 / gemini-1.5-flash-002 endpoints in europa-west2).

Contractual Instruments:

Google Cloud Master Agreement, Vertex AI Commercial Terms, Google Cloud DPST.

Data Transferred & Sensitivity:

Surrogate Tokenised Transcripts Only: Consultation text where all direct personal identifiers have been substituted with abstract tokens (e.g. [CLIENT_NAME_1], [NINO_1], [POSTCODE_1]).

Data Residency Commitment:

Pinned strictly to europa-west2 (London Data Centre). Endpoint: europa-west2-aiplatform.googleapis.com.

Data Retention & Logging Policy:

Zero Customer Data Retention: Prompts and completions are processed ephemerally during active inference and are not stored in persistent cloud logs or disk cache.

Zero Model Training Guarantee:

Google Cloud Vertex AI terms contractually guarantee that customer prompt inputs and generated model outputs are never used to train, fine-tune, or improve Google foundation models or shared systems.

3. Cisco Systems, Inc. (Cisco Webex)

Corporate Entity: Cisco Systems, Inc. (Cisco International Limited, UK)

Services Utilized: Cisco Webex Calling API / Webex Webhooks / Webex KMS (Telephony Ingest).

Contractual Instruments:

Cisco Universal Cloud Agreement (UCA) & Privacy Data Sheet for Cisco Webex Calling.

Data Transferred & Sensitivity:

Real-time telephony audio stream (RTP packets) during active inbound/outbound advice calls.

Call metadata (pseudonymous call IDs, durations, start/end timestamps).

Data Residency Commitment:

UK / European Telephony Infrastructure. Media nodes located within the United Kingdom.

Webex Cloud Recording & Retention Position:

Cloud Recording Disabled: CAW Webex Organisation settings enforce Cloud Recording = Disabled. No consultation audio is ever recorded or persisted in Cisco Webex Cloud Storage.

Call Detail Record (CDR) Retention: Call metadata (calling/called number, duration, call ID) is retained in the CAW Webex administrative portal for 30 days per standard telecom audit policy and purged automatically.

4. Microsoft Corporation (Microsoft Entra ID)

Corporate Entity: Microsoft Corporation (Microsoft Ireland Operations Limited / Microsoft Limited, UK)

Services Utilized: Microsoft Entra ID (formerly Azure Active Directory) for Single Sign-On (SSO) and Multi-Factor Authentication (MFA).

Contractual Instruments:

Microsoft Online Services Terms (OST) and Microsoft Data Protection Addendum (DPA).

Data Transferred & Sensitivity:

Adviser corporate identity, email address, user role, and session authentication tokens.

Data Residency Commitment:

UK Data Boundary / UK Tenancy.

3. Sub-Processor Audit & Verification Schedule
