

Pilot Evaluation Framework & KPI Measurement Methodology

Document Reference: CAW-PILOT-EVAL-2026-01
System: Case Ace v2.0 Client Consultation Recording & Note Drafting System
Organisation: Citizens Advice Wandsworth (CAW)
Standard: Advice Quality Standard (AQS Level 3) & ISO/IEC 42001:2023
Status: Formally Approved Evaluation Framework
Classification: Internal / Operational Pilot

1. Overview of Evaluation Dimensions

The pilot evaluation framework assesses Case Ace v2.0 across five core evaluation pillars:

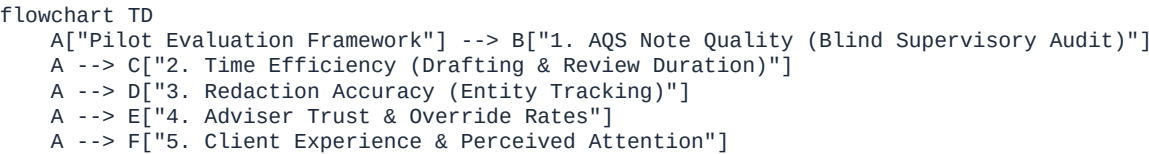

Pillar 1: Note Quality against AQS Level 3 Standard

Pillar 2: Adviser Time Efficiency & Casework Velocity

Pillar 3: Redaction Recall & Precision in Live Consultations

Pillar 4: Adviser Trust, Engagement & Override Rates

Pillar 5: Client Experience, Dignity & Consultation Quality

2. Key Performance Indicators (KPIs) & Target Benchmarks

PILOT EVALUATION KPIS AND TARGET BENCHMARKS				
Evaluation Dimension		Specific KPI Metric	Baseline (Manual)	Pilot
Target				
1. AQS Note Quality 95.0%	% of notes passing AQS Level 3 audit	88.5%		\$\ge\$
	Average supervisory score (/100)	82.4		\$\ge\$
	Missing statutory deadlines rate	4.2%		\$\le\$
2. Time Efficiency 6.0 mins	Note drafting time per consultation	22.5 mins		\$\le\$
	Daily casework write-up backlog (hours)	1.8 hrs/day		\$\le\$
	Live entity recall rate	N/A		\$\ge\$
3. Redaction Perf 92.0% (Zero Invariant)	Unredacted PII network leak rate	0%		\$\mathbf{0}\$
	Adviser satisfaction index (/5.0)	2.8 (Manual)		\$\ge\$
	Mean Review Gate inspection time	N/A		
4. Adviser Trust 45s - 90s (Active Engaged)	Review Gate entity override rate	N/A		\$5\% - 15\%
	Client comfort with recording	N/A		\$\ge\$
	Perceived adviser eye contact/engagement	72% Positive		\$\ge\$

3. Data Collection Methodology

1. Blind Quality Audits (Pillar 1)

Lead Supervisors review 50 randomly selected Casebook case notes drafted during the pilot, mixed with 50 notes drafted manually.

The review is completely blind (supervisors do not know which notes were generated with Case Ace).

Scored using the standard AQS Level 3 Quality Sheet (Enquiry Confirmation, Advice Accuracy, Action Plan, Deadlines).

2. Automated Non-PII Telemetry Aggregation (Pillars 2 & 3)

Aggregates anonymised operational telemetry from AuditLogStore:

timeSpentAtReviewGateSeconds

draftToSignOffSeconds

identifiersAddedOrRemovedByAdviser

gapsAcknowledgedCount

Calculates statistical distribution (median, 90th percentile) of note completion times without accessing text content.

3. Adviser Surveys & Focus Groups (Pillar 4)

Weekly 5-question pulse surveys measuring cognitive load, perceived note accuracy, and tool confidence.

Mid-pilot focus group (Week 3) and post-pilot debrief (Week 6) to gather qualitative feedback on UI workflow and error friction.

4. Voluntary Client Exit Survey (Pillar 5)

Short 3-question paper or tablet survey offered to consenting clients at the conclusion of their consultation:

“Did you feel the adviser listened to you and understood your situation?” (1–5 scale)

“How comfortable did you feel with the audio recording helper used today?” (Very Comfortable / Comfortable / Neutral / Uncomfortable)

“Did the adviser explain how your privacy is protected?” (Yes / No)
